

Flute - simple device to direct fluteplayer's airstream

- 2x elastic rubber bands
- 1x plastic sheet

 : afschrijven - Cut off
 : inknippen - Cut in

This simple and cheap device is used by Robert Pot's pupils in Germany and the Netherlands.

Here you see a photo collage of the simple construction step by step.

You have to try to find the right angle for you so the airstream will flow back to you. If you do it right you will still hear a good flute tone.
